Step: 6 — AI Candidate Support (HR)
Step description: Address failed login attempts for Google Sheets sharing

---

Step-by-Step Explanation:

1. **Identify Failed Login Attempts**: The system encountered multiple login failures for the email addresses listed in the knowledge context:
   - Kavinkumarar0@gmail.com
   - Kavinkumar777ar@gmail.com
   - sharan.b3333@gmail.com
   - rammeeey@gmail.com
   - agilanagilan444@gmail.com

2. **Analyze Error Patterns**: Each failed attempt provides a link to Google's support page for troubleshooting login issues:
   - [535-5.7.8 Invalid login: Username and Password not accepted](https://support.google.com/mail/?p=BadCredentials)

3. **Recommend Troubleshooting Steps**:
   - **Check Email Credentials**: Verify that the username (email address) and password are correct.
   - **Review Login History**: Look for any recent changes to the email account, such as password reset attempts or two-factor authentication settings.
   - **Test Alternate Credentials**: If unsure about a specific email's credentials, test login with other accounts known to be valid.

4. **Troubleshoot Common Issues**:
   - **Invalid Credentials**: Enter the correct username and password for each email address.
   - **Two-Factor Authentication (2FA)**: Ensure that two-factor authentication is enabled if required by Google Sheets.
   - **Password Reset**: If passwords have been reset, verify that the new passwords are being entered correctly.

5. **Contact Support if Necessary**: If login attempts continue to fail after verifying credentials and trying

alternate methods, contact Google's support team for further assistance with each email address individually.

Final Answer:
The system encountered multiple failed login attempts for emails listed in the knowledge context. To resolve this issue, verify the credentials (username and password) for each email address, enable two-factor authentication if necessary, and test login attempts again. If issues persist, contact Google's support team for further assistance with each account.
